· Good knowledge and experience in SQL, MySQL

· Experience with Unix based systems

· English – Intermediate and higher

Responsibilities:

· Implementation and delivery of Magento based solutions

· Building integrations and business solutions from scratch

· Maintain and extend existed project functionality

· Provide professional expertise for the business

· Communication with the clients

· Contribution to the company internal projects

Nice to have:

· Magento 1.x.x development experience

· Basic knowledge of HTML, CSS, JavaScript

· Experience with Docker technology

· Experience with using Magento Cloud or other cloud technologies

· Magento Certifications

· Participation in Magento Contribution

magecom

Who We Are

Magecom is a professional service company which specializes in Magento ecommerce web design and development. We are based in Kharkov, Ukraine and also have office in London, UK.
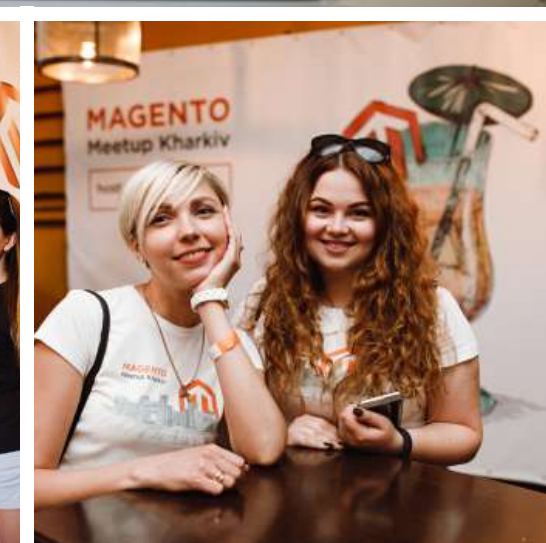

We do everything in the best possible way. We have eight years of experience in ecommerce and know how to deal with it the best. We put forward demands for writing code and work according to our processes for a high-quality code review delivery.

Also, we spend a lot of time learning the latest technologies to stay at the top. Quality matters, and we prove it by the work we do.

Our Events

Magento platform has a community of nearly 150,000 developers that stretch the globe. Within this ecosystem, Magento developers inform, educate, and support each other.

We were the first company in Kharkiv, one of Ukraine's IT-centers, to have launched quarterly Magento Meetup & Contribution Days back in 2017 to evolve the Magento community.
